

CVLOG Stats Defined

	Stat	Meaning
1.	Date	Date (Month/Day)
2.	Time	Time (24 hour clock)
3.	FSM memory	Memory used by the FSM's various buffers
4.	FSM writes total	Number of writes the FSM has done
5.	FSM writes journal	Number of writes to the journal
6.	FSM writes sb	Number of writes to the super block
7.	FSM writes buf	Number of synchronous writes to metadata
8.	FSM writes abm	Number of writes to the allocation bit map
9.	FSM writes inode	Number of writes of inodes
10.	FSM writes ganged	Number of inode writes that were able to be concatenated to improve efficiency
11.	FSM inode pool expand waits	Number of times the FSM had to wait to expand the inode pool
12.	FSM journal waits	Number of times the FSM had to wait to write to the journal
13.	FSM journal bytes used avg	Average number of bytes in the journal
14.	FSM journal bytes used max	Maximum number of bytes in the journal
15.	FSM free buffer waits	Number of times the FSM had to wait to get a free buffer
16.	FSM free inode waits	Number of times the FSM had to wait to get a free inode
17.	FSM wait revokes	Number of times the FSM had to wait to switch a file from exclusive to shared access
18.	FSM wait avg	Revoke wait time divided by the number of FSM wait revokes
19.	FSM wait min	The shortest wait for a revoke
20.	FSM wait max	The longest wait for a revoke
21.	FSM threads max busy hi-prio	Maximum number of threads working on operations except open and lookup
22.	FSM threads max busy lo-prio	Maximum number of threads working on open and lookup
23.	FSM threads max busy dmig	Maximum number of threads working on data migration
24.	FSM threads max busy events	Maximum number of threads working on data migration events
25.	FSM msg queue hi-prio now	Current size of the high priority queue
26.	FSM msg queue hi-prio min	Smallest size of the high priority queue
27.	FSM msg queue hi-prio max	Largest size of the high priority queue
28.	FSM msg queue lo-prio now	Current size of the low priority queue
29.	FSM msg queue lo-prio min	Smallest size of the low priority queue
30.	FSM msg queue lo-prio max	Largest size of the low priority queue
31.	FSM msg queue dmig now	Current size of the data migration queue
32.	FSM msg queue dmig min	Smallest size of the data migration queue
33.	FSM msg queue dmig max	Largest size of the data migration queue
34.	FSM msg queue events now	Current size of the event queue
35.	FSM msg queue events min	Smallest size of the event queue
36.	FSM msg queue events max	Largest size of the event queue
37.	FSM cache inode lookups	Number of inodes that were found in the FSM's cache
38.	FSM cache inode misses	Number of inodes that were not found in the FSM's cache
39.	FSM cache inode hits %	Percentage of inodes found in the FSM cache
40.	FSM cache free incore inodes now	Current number of free in-core inodes
41.	FSM cache free incore inodes min	Minimum number of free in-core inodes
42.	FSM cache free incore inodes max	Maximum number of free in-core inodes

CVLOG Stats Defined

	Stat	Meaning
43.	FSM cache buffer lookups	Number of metadata entries that were looked up by the FSM
44.	FSM cache buffer misses	Number of metadata entries that were not in the FSM's buffer cache
45.	FSM cache buffer hits %	Percentage of metadata entries that were found in the FSM's buffer cache
46.	FSM cache free buffers now	Number of free buffer cache blocks in the FSM
47.	FSM cache free buffers min	Minimum number of free buffer cache blocks in the FSM
48.	FSM cache free buffers max	Maximum number of free buffer cache blocks in the FSM
49.	FSM cache attrs now	Number of cvnodes cached by connected clients
50.	FSM cache attrs min	Minimum number of cvnodes cached by connected clients
51.	FSM cache attrs max	Maximum number of cvnodes cached by connected clients
52.	FSM AllocSession sessions	Number of times clients allocated from their reserved space.
53.	FSM AllocSession maxactive	Maximum number of allocations from reserved space existing at one time
54.	FSM AllocSession stolen	Number of timed-out reservations that were used by a later allocation
55.	FSM AllocSession stolenmax	Amount of reserved space that has been used
56.	FSM extent lookups	Number of times the requested data block was found
57.	FSM extent misses	Number of times the requested data block was not found
58.	FSM extent hits %	Percentage of times the correct data block was found
59.	FSM extent hint tries	Number of times FSM searched the next extent, assuming it would return the requested data block
60.	FSM extent hint misses	Number of times the next extent in the list didn't reference the requested data block
61.	FSM extent hint hits %	Percentage of times the extent hint was correct
62.	Lookup cnt/avg/min/max	Find a file or directory in a directory
63.	Mkdir cnt/avg/min/max	Create a directory
64.	Create cnt/avg/min/max	Create a file
65.	Getattr cnt/avg/min/max	Get the attributes of a file or directory
66.	Readdir cnt/avg/min/max	Read a directory
67.	Setattr cnt/avg/min/max	Set the attributes of a file or directory
68.	Rmdir cnt/avg/min/max	Remove a directory
69.	Remove cnt/avg/min/max	Remove a file
70.	Rename cnt/avg/min/max	Rename a file or directory
71.	Link cnt/avg/min/max	Hard link a file or directory
72.	AllocSpace cnt/avg/min/max	Grow the size of a file
73.	Open cnt/avg/min/max	Open a file
74.	GetMediaType cnt/avg/min/max	Deprecated, no longer used
75.	GetExtAttr cnt/avg/min/max	Get the extended attributes for a file or directory
76.	Close cnt/avg/min/max	Close a file
77.	Flush cnt/avg/min/max	Deprecated, no longer used
78.	ModifySpace cnt/avg/min/max	Deprecated, no longer used
79.	SymLink cnt/avg/min/max	Create a symbolic link to a file
80.	ReadLink cnt/avg/min/max	Find the target of a symbolic link
81.	MultiPathLookup cnt/avg/min/max	Deprecated, no longer used

CVLOG Stats Defined

	Stat	Meaning
82.	FullPathReverse cnt/avg/min/max	Find the full path to the root of the file system from a given file or directory
83.	PunchHole cnt/avg/min/max	Free disk space used by part of file, creating a sparse file
84.	ExpandInodes cnt/avg/min/max	Expand the pool of available inodes
85.	AllocSpaceApi cnt/avg/min/max	Grow the size of a file
86.	GetNTSecurity cnt/avg/min/max	Returns the NT security descriptor associated with a file or directory
87.	SetNTSecurity cnt/avg/min/max	Sets the NT security descriptor for a file or directory
88.	Flush2pc cnt/avg/min/max	Flush client inodes to disk and free FSM internal inode cache
89.	DirAttr cnt/avg/min/max	Get the stats for files or directories inside a directory
90.	SwapExtents cnt/avg/min/max	Swap the allocation of one file with that of another
91.	Getquota cnt/avg/min/max	Get quota values for a file or directory OR for a user or group
92.	Setquota cnt/avg/min/max	Set quota values for a user or group
93.	GetPerfectFit cnt/avg/min/max	Returns the number of times a file was tested to see if it's marked for "perfect fit"
94.	BulkCreate cnt/avg/min/max	Create multiple files or directories
95.	CreateV3 cnt/avg/min/max	Create a file
96.	LookupV3 cnt/avg/min/max	Find a file or directory in a directory
97.	OpenRet cnt/avg/min/max	Client is switching a file to a shared access state
98.	VopDirattrV2 cnt/avg/min/max	Get the stats for files or directories inside a directory
99.	VopGetattrV4 cnt/avg/min/max	Get the attributes of a file or directory
100.	VopLookupV4 cnt/avg/min/max	Find a file or directory in a directory
101.	SetPerfectFit cnt/avg/min/max	Set a file to only allocate from free space that is exactly the size of the requested allocation
102.	GetAffinityList cnt/avg/min/max	Get the list of unique affinity keys
103.	GetDMxattr cnt/avg/min/max	Deprecated, no longer used
104.	VopCapNegotiate cnt/avg/min/max	Return the capabilities of the FSM running the file system
105.	VopReaddir2 cnt/avg/min/max	Read a directory
106.	CreateV4 cnt/avg/min/max	Create a file
107.	MkdirV4 cnt/avg/min/max	Create a directory
108.	VopClientID cnt/avg/min/max	Record the client identifier
109.	VopInsertBlobTag cnt/avg/min/max	Used when de-duplicating a file
110.	VopSubTypeXattr cnt/avg/min/max	Used when doing data migration
111.	BulkGetattr cnt/avg/min/max	Get the attributes of multiple files or directories
112.	GetResyncAttr cnt/avg/min/max	Resynchronize inode attributes with a client
113.	NotifyContMod cnt/avg/min/max	Xsan Spotlight notification that the contents of a file changed
114.	GetLinkInfo cnt/avg/min/max	Process a reverse path lookup element in the path of the file
115.	FullSync cnt/avg/min/max	Deprecated, no longer used
116.	TknRet cnt/avg/min/max	3.5-only; client is unblocking a synchronous inode change request
117.	InodeCacheCheck cnt/avg/min/max	3.5-only; debugging hook, not used on production systems
118.	CreateV5 cnt/avg/min/max	Create a file
119.	MkdirV5 cnt/avg/min/max	Create a directory
120.	DataRequest cnt/avg/min/max	Read or write a file
121.	PartRequest cnt/avg/min/max	Return stripe group information to a client

CVLOG Stats Defined

	Stat	Meaning
122.	SizeRequest cnt/avg/min/max	Deprecated, no longer used
123.	MtimeRequest cnt/avg/min/max	Deprecated, no longer used
124.	DataRequestV2 cnt/avg/min/max	Read or write a file
125.	GetExtentListApi cnt/avg/min/max	Get a group of extents for a file
126.	TokenRequestV2 cnt/avg/min/max	Return stripe group information to a client
127.	TokenRequestV3 cnt/avg/min/max	Read or write a file
128.	“Reserved9” cnt/avg/min/max	Read or write a file using previously reserved space
129.	PartChange cnt/avg/min/max	FSM informing clients that a stripe group has changed
130.	InodeChange cnt/avg/min/max	Broadcasts of changed inodes to clients that have them cached
131.	OpenChange cnt/avg/min/max	Broadcasts of files that have been opened to clients that have the inode cached
132.	FsChange cnt/avg/min/max	Broadcasts of file system changes to all clients
133.	FileRevoke cnt/avg/min/max	Deprecated, no longer used
134.	TokenChangeV4 cnt/avg/min/max	Broadcasts of changed inodes to clients that have them cached
135.	TokenReqAlloc cnt/avg/min/max	Read or write a file
136.	TokenChangeSync cnt/avg/min/max	3.5 only, not currently used
137.	TokenChangeV5 cnt/avg/min/max	3.5 only, broadcasts of changed inodes to clients that have them cached
138.	HiPriWr cnt/maxq	Number of IOs to the journal and the maximum number queued at any one time
139.	avg/min/max	Time spent waiting for device IO to complete at driver level
140.	sysavg/sysmin/sysmax	Time spent waiting for device IO, including notification from driver
141.	avglen/minlen/maxlen	Length, in bytes, of IOs
142.	Read cnt/maxq	Number of read IOs to the metadata LUN and the maximum number queued at any one time
143.	avg/min/max	Time spent waiting for device IO to complete at driver level
144.	sysavg/sysmin/sysmax	Time spent waiting for device IO, including notification from driver
145.	avglen/minlen/maxlen	Length, in bytes, of IOs
146.	Write cnt/maxq	Number of write IOs to the metadata LUN and the maximum number queued at any one time
147.	avg/min/max	Time spent waiting for device IO to complete at driver level
148.	sysavg/sysmin/sysmax	Time spent waiting for device IO, including notification from driver
149.	avglen/minlen/maxlen	Length, in bytes, of IOs
